Not too late yet to get Win10 (64bit)

Microsoft has stopped support of Windows XP and Windows 7. Bug fixing and crucial security updates are no longer available. If you have not already done so, Raith strongly recommends you to update your system to a Windows 10 environment. Raith supplies preconfigured update packages to avoid any delays during the installation and keep downtime to a minimum. Please contact your Raith Service office to get your quote.

Good reasons, no more risks:

- Windows 10 security updates will keep your system safer
- Avoid local IT and network restrictions and ensure Raith Remote Support remains available
- Required for updates of Raith Nano Suite

Speed up – new aperture driver

A new type of aperture driver is now available for many Raith systems. Benefit from smoother and faster usage by updating the aperture driver of your aging system. The new aperture driver has a step size 2 times better than the old version (1 μ m vs. 2 μ m). Causing improved gun alignments you will benefit from a better beam quality. Additionally, changing between user modes will speed up.

The new aperture driver is faster with a higher precision!

Contact your Raith service center to check its availability for your Raith system!
